

## P Type Mounting Clips

'P' type mounting clips are ideal elements for retaining / holding pipes, cables, cable harnesses, hoses etc. These 'P' clips act as form fitting adjustable bands for ease of assembly & installation. The band ends of these clips are reinforced to prevent any tearing or loosening due to high mechanical loads. These galvanized steel, 'P' clips are fitted with EPDM liners which help achieve a tighter grip on the cable / conduit & also act as dampeners for sound & vibration.

## Technical Data

|                   |                                      |
|-------------------|--------------------------------------|
| Material          | Clip - Zinc Plated, Galvanised Steel |
| Temperature Range | -40° C to +120° C                    |
| Profile           | EPDM                                 |
