

Distribution Boards

These enclosures are used for creating power distribution circuits. Various options are available based on the number of miniature circuit breakers (MCBs) that can be installed inside in an array. Most of these enclosures have hinged lids for easy access to the MCBs installed inside.

Ordering Information

Without Hinged Lid

Cat. No.	Length (mm)	Width (mm)	Height (mm)	Ingress Protection	Type of Modules	Standard Pack
M91.04	100	135	85	IP 40	2/4 Module	1
