

## O Rings - For PG Thread Cable Glands

O-rings are round sealing elements made up of NBR material with circular cross-sections and are mainly used in static applications. These sizes are defined by the internal width and the cross-section width. These rings can withstand a wide temperature range from -20-degree Celsius to 100-degree Celsius. They are available in PG thread type.

### Technical Data

|                   |  |                  |
|-------------------|--|------------------|
| Material          |  | NBR, black       |
| Temperature Range |  | -35° C to +120°C |
| Threads available |  | Pg Thread        |

### Ordering Information

#### Pg Threads

| Cat. No. | Internal Thread | Size   | Thickness | Standard Pack (Pieces) |
|----------|-----------------|--------|-----------|------------------------|
| OR-P07   | 10.5            | Pg7    | 1.5       | 50                     |
| OR-P09   | 14.5            | Pg9    | 1.5       | 50                     |
| OR-P11   | 16.5            | Pg11   | 1.5       | 50                     |
| OR-P13.5 | 18.5            | Pg13.5 | 1.5       | 50                     |
| OR-P16   | 20.5            | Pg16   | 1.5       | 50                     |
| OR-P21   | 26              | Pg21   | 2         | 50                     |
| OR-P29   | 35              | Pg29   | 2         | 50                     |
| OR-P36   | 45              | Pg36   | 2         | 50                     |
| OR-P42   | 52.1            | Pg42   | 2         | 50                     |
| OR-P48   | 57              | Pg48   | 2         | 50                     |
