

Polyamide Cable Glands

Polyamide Cable Glands are easy to use and provide high-quality strain relief with a wide clamping range. These glands are manufactured from a high-grade polyamide material, an essentially strong material that is self-extinguishing and corrosion resistant. The cable glands are rated up to IP 68 and they are suitable for standard industrial applications. These Cable glands are manufactured and tested according to DIN EN 62444. The lamellar construction of glands provides an excellent grip on the cable. Available in below-mentioned thread types a) Metric thread b) PG thread c) NPT thread
