

EMC Brass Cable Glands - (3rd Generation) - Metric Thread

The 3rd generation EMC cable glands offer an advantage that as the gland is tightened the contact force exerted on the braided portion of the cable also increases, this leads to lower contact resistance. Also, the wider gap between the contact leaves allows for easier insertion and removal of the cable.

Technical Data

Material	Brass, Nickel Plated
Temperature Range	-20° C to +100°C Continuous, -40°C to +150°C Intermittent
Protection Class	IP 68-5 Bar, 30 min
O Ring	Perbunan (NBR)
Sealing Ring	CR-Chloroprene Rubber
Attachment Thread	EN 60423
Clamping Insert	Polyamide 6 V2
Contact Spring	Special Copper Alloy
