

Panel Mounting Inclined Sockets - CPSA33248

These sockets act as fixed female connectors and can be mated with male plugs. Connectwell inclined sockets are suitable for mounting onto panels which have a 'recess' behind them. The inclined sockets ensure that on mating the plugs remain at an angle to the panel surface thereby reducing the total space required for installation.

Technical Data

| | |
|--------------------------------------|---------------------------|
| Material | Copper Zinc Alloy (MS 58) |
| Voltage Rating (V) | 230 |
| Current Rating (A) | 32 |
| No of Pins | 3 |
| Ingress Protection | IP 44 |
| Connection | Screw Connection |
| Contact Resistance | < 1m Ω |
| Suitable Wire Cross Section Stranded | 6 |
| Suitable Wire Cross Section Solid | 10 |
