

Panel Mounting Inclined Sockets - CPSA51648

These sockets act as fixed female connectors and can be mated with male plugs. Connectwell inclined sockets are suitable for mounting onto panels which have a ‘recess’ behind them. The inclined sockets ensure that on mating the plugs remain at an angle to the panel surface thereby reducing the total space required for installation.

Technical Data

Material	Copper Zinc Alloy (MS 58)
Voltage Rating (V)	400
Current Rating (A)	16
No of Pins	5
Ingress Protection	IP 44
Connection	Screw Connection
Contact Resistance	< 1m?
Suitable Wire Cross Section Stranded	4
Suitable Wire Cross Section Solid	6
