

### Panel Mounting Straight Inlet - CPIS31647

These inlets act as fixed male connectors and can be mated with female connectors. Connectwell straight inlets are suitable for mounting onto panels which have a 'recess' behind them. The straight inlets ensure that on mating the plugs remain perpendicular to the panel surface.

### Technical Data

|                                      |                           |
|--------------------------------------|---------------------------|
| Material                             | Copper Zinc Alloy (MS 58) |
| Voltage Rating (V)                   | 230                       |
| Current Rating (A)                   | 16                        |
| No of Pins                           | 3                         |
| Ingress Protection                   | IP 44                     |
| Connection                           | Screw Connection          |
| Contact Resistance                   | < 1m?                     |
| Suitable Wire Cross Section Stranded | 4                         |
| Suitable Wire Cross Section Solid    | 6                         |
