

Surface Mounting Inlet - CSI46348

These inlets act as fixed male connectors and can be mated with female connectors. Connectwell surface mounting inlets are suitable for mounting onto surfaces which do not have a 'recess' behind them. The surface mounting inlets ensure that on mating the connectors remain at an angle to the surface thereby reducing the total space required for installation. The surface mount housing is provided with a nipple to sustain the IP protection grade after insertion of cable.

Technical Data

Material		Copper Zinc Alloy (MS 58)
Voltage Rating (V)		400
Current Rating (A)		63
Ingress Protection		IP 44
Connection		Screw Connection
Contact Resistance		< 1m?
Contact Resistance Suitable Wire Cross Section Stranded		< 1m?
