

Flexi Cover Conduits

Flexi-Cover conduit is a quick and easy system for organizing and protecting pre-connected wires/cables. This system consists of a Conduit and a tool for locking and unlocking. The Conduit is an open tube made of Polyethylene resin which is capable of easily returning back to its normal state. The Conduit can be re-used hundreds of times with guaranteed flexibility. The tool for locking and unlocking operation is made of ABS and has a side opening that allows quick and easy placement of cables in the conduits.
